

# LASER SENTINEL™ ENHANCED

Safety laser scanner based on Time Of Flight measurement  
 More than 72 m<sup>2</sup> safely monitored, with 5.5 m over 275°  
 High detection performances in compact size  
 Advanced dust filtering  
 Easy programming with intuitive Graphic User Interface

- Dimensions (w,d,h): 102 , 112.5, 152 mm
- I/O connection with standard M12 cables
- Up to 3 simultaneous safety zones
- 2 Warning zones up to 40 m
- 30/40/50/70/150 mm selectable detection capability
- Up to 70 zone sets
- Partial dynamic muting
- Metal brackets allowing full orientation and fast replacement
- Advanced measurement data protocol
- Colour graphic display for monitoring and diagnostics
- Speed measurement with encoder inputs

## APPLICATIONS

- Robot cells (pick and place, inspection, testing, welding, etc)
- Palletizers / depalletizers
- Open machinery, process lines
- Automated Guided Vehicles (AGV)
- Automated Guided Carts (AGC)
- Mobile Industrial Robots

## INDUSTRIES

- Automotive
- Material handling
- Secondary Packaging
- Food
- Wood
- Ceramics

<b>Advanced measurement data</b>	Yes (*4)						Yes (*5)	
<b>Measurement data max. angular resolution</b>	0.1°						0.5°	
<b>APPLICATIONS</b>								
<b>Horizontal static</b>	Yes							
<b>Vertical static</b>	Yes							
<b>Moving (simple AGVs)</b>	Yes							
<b>Moving (medium complexity AGVs)</b>	No						Yes	
<b>NOTES</b>								
(*1) The max number of zone sets switching is reached when all inputs are used for zone set switching. Using 8 inputs or encoder speed measurement the max. number of zone set of 70 can be reached.								
(*2) With 1 safety zone only, up to 3 zone sets are available in any activation order. Up to 6 are available only using some allowed activation order. Refer to Manual and GUI for details.								
(*3) Override input, Muting Enable input and Muting Lamp output on SLS-SAx are mutually exclusive								
(*4) Using the programming connector on the front of the device								
(*5) Using the rotating connector in the back of the device								
(*6) Only using 12-pin connector								
(*7) To use more than 2 OSSDs, they have to be selected between configurable outputs

## NOTES

ETHERNET TO HOST CABLES are used for programming and monitoring the device with DL Sentinel, and for reading the measurement data.  
 CABLES TO REMOTE are used to connect the Master models to the Slaves like in the following picture

The colour graphical display of LASER SENTINEL shows if any person has been detected in the safety or warning areas, causing by consequence the stopping of the machine or the warning signal to activate. The presence of 11 angular sectors allow to show the direction in which the person has been detected, and its colour indicate if it has been inside the safety (red) or the warning zone (yellow).

DISPLAYED ICON	NAME	DESCRIPTION
 <b>GO</b>	<b>ON state</b>	The device is correctly functioning (OSSDs GO Condition). No presence detected in the Safety and Warning Area. (Configuration accepted)
 <b>WARNING</b>	<b>OFF State for intrusion in Safety Area</b>	The device is correctly functioning. The device has detected a presence in the Warning Area (Configuration accepted)
 <b>STOP</b>	<b>Warning for intrusion in Warning Area</b>	The device is correctly functioning (OSSDs STOP Condition). The device has detected a presence in the Safety Zone. (Configuration accepted)
 <b>REFERENCE</b>	<b>OFF State for Reference Points</b>	The device has detected that Reference Points have moved. The Display Sector in the direction of the moved reference point is lit in blue.

LED NUMBER	SYMBOL	DEFINITION	COLOR	MEANING	OUTPUT STATUS
1		Object Detection in Safety Zone 1 (OSSD 11/12).	GREEN	No object detected	OSSDs OFF
			RED	Object detected	OSSDs ON
2		Object Detection in Safety Zone 2 (OSSD 21/22).	GREEN	No object detected	OSSDs OFF
			RED	Object detected	OSSDs ON
3		Object Detection in Safety Zone 3 or Warning Zone 2	AMBER	Object detected	OSSDs OFF Warning 2 ON/OFF if set up
			OFF	No object detected	OSSDs ON Warning 2 output varies depending on warning function configuration
4		Object Detection in Warning Zone 1	AMBER	Object detected in Warning Zone 1	Warning 1 output varies depending on warning function configuration
			OFF	No object detected in Warning Zone 1	Warning 1 output varies depending on warning function configuration
5		Interlock	AMBER	No Object detected in Safety Zone Device waiting for Manual Restart (LED1 RED)	OSSDs OFF
			OFF	No Object detected in Safety Zone Device in ON Status (LED 1 GREEN)	OSSDs ON
			OFF	Object detected in Safety Zone Device in OFF Status (LED 1 RED)	OSSDs OFF
